

# TOXFIN<sup>®</sup> CARE

An extensive protection against mycotoxins  
with an all-in-one strategy

## Why control mycotoxins?

Mycotoxin control is essential for health and performance of poultry, ruminants or pigs, as mycotoxins contaminate almost all agricultural ingredients.

Kemin offers a complete mycotoxin management toolbox to tackle your mycotoxin threats. Protecting animals from the adverse effects following ingestion of mycotoxins contaminated feed, is our priority.

The TOXFIN range offers multiple solutions to reduce the bioavailability of mycotoxins and their negative effects, aiding the production of safe feed.

## Benefits

- Protects the animal from mycotoxin threats
- Reduces the bioavailability of feed mycotoxins in the gastrointestinal tract and promotes mycotoxin excretion via faeces
- Fortifies the natural defense system of the animal and safeguards the organs
- Maintains the availability of essential nutrients to the animal
- Reduces symptoms associated with mycotoxicosis
- Avoids performance reduction caused by mycotoxicosis

## The science behind

An all-in-one solution to tackle the adverse effects of mycotoxins in animals by combining different strategies:

1. Eliminating mycotoxins by unique adsorbent blend ((e.g. bentonite (1m558) fulfilling the European Regulation 1060/2013 as an aflatoxin B1 binder)
2. Preventing oxidative stress by the force of plants extracts
3. Supporting and protecting the liver by the force of plants extracts
4. Modulating the immune system by unique algae derived beta-glucan

## Packaging

- 25 kg bags

## Dosage

- 1-3 kg per ton of feed for monogastric

## Suitable for

## Administer via
